

DT3200 Feature Benefits

Feature	Benefit
Compact Form Factor	The CLI DT3200 requires very little desktop space or none when used with the included VESA mounting hardware for back of display mounting. As one of CLI's small form factor Thin Client models, it also uses less energy: less than 6 watts of power in full operation. The dimensions are (W x D x H) are: 1.4 x 5.2 x 5.7" Weight: 1.3 lbs (0.6kg).
VDI Client Flexibility	The CLI DT3200 includes two local clients providing user flexibility of connecting to various VDI data centers and future proofing investment. <ol style="list-style-type: none"> 1. Citrix HDX® via Receiver client 2. RemoteFX® via RDP client
Powerful Performance	The CLI DT3200 provides an unparalleled user experience, great graphics performance and high fidelity multimedia due to CLI's innovative performance optimizations for the 1.5GHz SoC ARM Cortex-A9 Dual Core CPU available only on the CLI DT3200. The CLI DT3200 boots up in 6 seconds.
Simplified Management Easy to Manage	The CLI DT3200 can be remotely configured using CLI's cloud client device management (CCDM) tool or out of the box plug and play to your host. DT3200 Zero Client mode provides a simplified on screen configuration "wizard" allowing quick and easy setup of the device connection without using the management software.
Gigabit Ethernet NIC and Optional Wi-Fi™	The common networking protocols are supported with a 10/100/1000 Base-T Fast Ethernet NIC. Internal 802.11b/g/n single or dual band wireless is available. TCP/IP with DNS, DHCP and PPP are supported
Affordable	The CLI DT3200 sets a new level of price / performance and is one of CLI's most economical devices
